

Aesthetic Rhodium Coated Nickel Titanium Arch Wire

Phoenix *Champagne* rhodium coated SE NiTi features low reflectivity and reduced visibility in a highly aesthetic arch wire while offering the same outstanding consistency and performance as un-coated Phoenix SE NiTi.

Unlike epoxy coated NiTi wires that chip and flake rapidly in the mouth, Phoenix *Champagne* rhodium coated NiTi wires provide a uniform 6-8 weeks of aesthetic super elastic performance without chipping or flaking.

Additionally, since the rhodium coating is placed on the labial side only, frictional forces remain comparable to Phoenix un-coated nickel titanium arch wires.

Phoenix *Champagne* NiTi is the perfect aesthetic choice for all cosmetically oriented patients.

SIZES

ROUND: .014, .016, .018 & .020

RECTANGULAR: .016x.022, .017x.025 & .019x.025

Manufactured in South Korea

“Stay Tite-High Memory” Solid Core Elastic Thread

surface “nubs” prevent slippage

.025 gray or clear
.030 gray or clear
\$13 per 25' spool

Mfg in the USA.

A PREMIUM HEAT-CURED MEDICAL-GRADE POLYMER CHAIN

\$28 per spool

Endura HIGH-PERFORMANCE stain resistant chain delivers far greater rebound and elasticity than conventional chain. .018 material thickness allows for easy ligation and “piggy-backing” with modules.

Endura HIGH-PERFORMANCE chain works great with all limited tie wing areas found on many self-ligation and ceramic brackets.

available in
clear or light gray
2 meter spools

Endura HIGH-PERFORMANCE chain delivers a uniform, continuous force over significantly longer periods of time in comparison to other elastic chains.

Continuous: Maintains 83% of initial force over 4 weeks.
Medium: Maintains 74% of initial force over 4 weeks.

MPEP BPOC

Phoenix *Ortho Traction Pads*

Feature surgical quality stainless steel pads combined with nickel-free 1” length gold chain.

Individually assembled by hand on a jewelers bench to the highest quality control standards.

Chain is very smooth and comfortable, strong but not bulky and it works with all popular elastic and needle sizes.

Mfg in the USA.

\$28 each

Choose from Two Configurations

MPEP. Sintered mesh screen for highly efficient bonding. Eyelet profile makes it easy to pick up. Trim and bend it to work anywhere. Highly flexible 4mm mesh pad.

BPOC. 4 x 3.1mm gently curved surgical grade stainless steel pad with mesh screen base. Chain swivels 360 degrees for ligation in any direction. Perfect curve for cuspid placement.
