

### ORTHODONTICS

- Rounded anterior "ovoid" arch forms in a set of three paired and coordinated sizes
- Reduced-size arch shapes allow smaller teeth to maintain canines at the arch wire "corners"
- By matching the wire to the existing dental arch and accompanying tooth sizes, a reduction in lateral force received by the arch produces more patient comfort
- Engineered for a variety of tooth sizes to produce a more suitable and uniform display of balanced anterior teeth
- Enhances the functional fit and aesthetic display of your patient's smile by reducing "dark areas" associated with broad/square arch forms
- Gradual movement in the same shape/width from start to finish may enhance retention as teeth experience gradual movement throughout treatment rather than requiring adjustments in arch widths in the finishing stages of treatment

#### WIRE SIZES AND PRICING

**Trans Thermal** - Round: .016, .018 | *\$19 per pack of 10*  
 Square/Rectangular: .018x.018; .020x.020; .014x.025; .016x.022; .016x.025; .017x.025; .018x.025; .019x.025; .017x.027; .021x.027 | *\$19 per pack of 10*

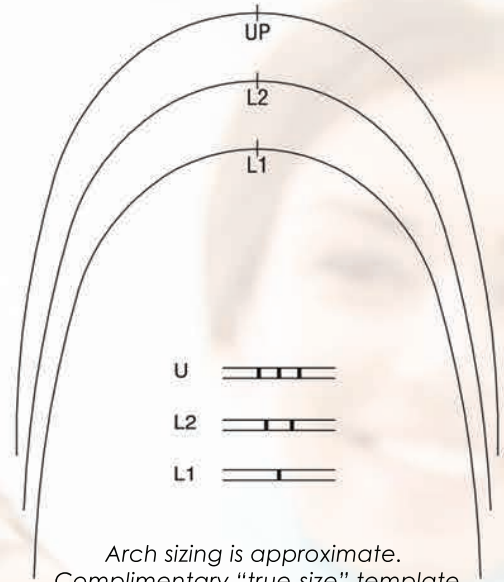

**SE NiTi** - Round: .013; .014; .016; .018; .020 | *\$14 per pack of 10*  
 Square/Rectangular: .016x.016; .018x.018; .020x.020; .014x.025; .016x.022; .016x.025; .017x.025; .018x.025; .019x.025 | *\$16 per pack of 10*

**MTA (Molybdenum Titanium)** - Rectangular: .016x.022; .016x.025; .017x.025; .018x.025; .019x.025 | *\$41 per pack of 10*

**Stainless Steel** - Round: .016; .018; .020 | *\$35 per pack of 100*  
 Square/Rectangular: .016x.016; .018x.018; .020x.020; .014x.025; .016x.022; .017x.025; .018x.025; .019x.025 | *\$6 per pack of 10*
