

Phoenix molar bands are permanently etched using an electro chemical etching process for easy identification. Band interiors are micro-etched for roughness to increase bond strength.

- Orion molar bands' precision-shaped tooth anatomy gives a tight, secure fit with excellent retention.
- Distinct right and left anatomy is completely proportioned in all planes and for each band size.
- Stainless steel that exhibits "hardness" properties for strength to avoid wall collapse when fitting.
- Malleable "Snug Fit" that requires little or no burnishing.
- Increased buccal height for greater flexibility in the placement and positioning of buccal tubes and lingual attachments.
- 36 upper and lower sizes graduated in even, closely spaced increments for superb fit.
- Buccal/cusp indent eliminates occlusal interference.
- Permanent markings on the mesial surface clearly identifies the size and quadrant.

**** Larger sizes (33-36) now available ****

Maxillary 1st & 2nd Molar Bands
